Project Delivery & Technical Support

01 Requirements

Provide service category, site and scope, required deliverables and schedule. For equipment purchases, specify the use case and preferred configuration.

02 Commercial and technical review

Confirm service item, pricing unit, quantity and budget. Formal quotations, scope and applicable conditions are agreed in writing.

03 Implementation and quality review

Record scope, progress, outputs and review items as agreed; confirm file completeness, format and acceptance requirements.

04 Delivery and acceptance

Deliver agreed outputs and explanatory documents, retaining delivery and acceptance records. Timing and deliverables are governed by the agreement.

05 Project tracking and support

Use the project access code issued by an administrator in the customer center. Authorized deliverable links appear when the project has been delivered.
